8"	8 15/16"	50	50		50

Available

- Aluminum, Brass, Plastic, Stainless
- Type: "E" Quick Disconnect
- Type "E" male camlock (Cam & Groove) coupler to hose shank.

Connections

The male side of this adapter will only connect to female camlock.

How it works

To make a connection, simply slide the adapter into the coupler and with normal hand pressure, press the cam levers down.

Uncoupling is as quick and simple as coupling. Just lift the cam arms and remove the adapter.

Cam and groove couplings, also called cam lock fittings or quick connect couplings, are used in most industries as a hose connection to avoid leakages. This kind of coupling is popular because it is considered to be a simple and economical way of re-connecting and disconnecting.

WARNING

Under no circumstances should cam and groove couplings be used for compressed air or steam!
